Super Rack

Super Racks

Super Racks (SR) are more sophisticated versions the 40-foot Flatracks that provide added flexibility to loading special cargo through the use of the adjustable height features that allow for a much wider variety of dimensional options to position the cargo, ranging from helicopters to drilling machinery. Apart from expanding the range of cargo acceptance, Super Racks can also offer cost efficiency when handling shipments of multiple cargo loads that require stacking.

Super rack (40SR) 40'x 8'x13'6" with full extension

		Steel		
		Millimetres	Feet	
Internal Dimensions	Length	11,615	38'1"	
	Width	2,438	8'	
	Height	Nil Extension	2,264	7'5"
		1st Step	2,568	8'5"
		2nd Step	2,873	9'5"
		3rd Step	3,178	10'5"
	4th Step	3,483	11'5"	
		Kilograms	Pounds	
Weight	Max Gross	50,000	110,231	
	Tare	6,000	13,228	
	Max Payload	44,000	97,003	

[Note: If overall width, inclusive of packing, securing and lashing materials, does not exceed 2,438mm, the cargo will be treated as 'in-gauge' in width.]
